

NEWSLETTER – CO₂- compensation & trade fair

Climate neutral transport of goods

Signer Titanium pursues a sustainable and ethical business policy. Our climate is also close to our hearts. In 2020, we started to record the CO₂ emissions caused by transports. Today, we fully **offset the CO₂ emissions for land transport, sea freight and air freight**. In addition, we try to influence the logistics chains and encourage our customers to plan early whenever possible and to avoid air freight shipments. The resulting CO₂ emissions are calculated annually, converted into a monetary amount and invested in local and global carbon offset projects through the "myclimate" foundation.

We also draw attention to our commitment with a specially created logo on our business papers (confirmations, delivery notes and invoices).

SWISS MEDTECH EXPO 2021 in Lucerne

On **14 and 15 September 2021**, the meeting place for the medical technology sector will take place in Lucerne. Visit us at our **stand no. F2185 in hall 2**, we are very pleased to finally be able to welcome you personally again. Would you like a consultation or do you have specific questions? Make an appointment with us directly at <https://www.visit.medtech-expo.ch/de/p/signer-titanium-ag#?> or by calling +41 44 716 12 65 at the Swiss Medtech Expo. Beside German and English, we will speak to you on Tuesday in Italian, and on Wednesday also in French. We look forward to your visit.
